Skills:

- **Programming Languages** : Python (Pandas, NumPy, Array, Matplotlib)
- **Database Management** : MySQL
- **Data Manipulation** : Excel (pivot tables, VLOOKUP, pie charts), SQL (queries, joins)
- **Data Visualisation** : Power BI, Excel dashboards
- **Data Cleaning** : Techniques for handling missing data, normalisation and transformation

Education:

- **Bachelors of Computer Application**
Patna College, Patna University
CGPA - 8.9 (2025)
- **Higher Secondary Education**
A.N. College, Patliputra University
Percentage - 73 (2018)

Projects:

- **Dashboard Creation ([link](#))**
Fetched data of a retail store from internet. Transformed the data, created a dashboard and generated insights. This helped me to practise data cleaning, visualisations using macros and dashboard.
- **Chatting Application ([link](#))**
Worked on interesting idea of creating a chatting application. This application was created by using python. The idea was to have a chat between multiple systems. This includes a server and a client. The server has a database in which the chat will be stored with timestamp.
- **Bill Generator ([link](#))**
Adding products to cart is always interesting to most of us. While working on this project I tried creating a GUI app which could add products to your cart and generate bill if we want to purchase the products. The bill will get saved in a file and can be printed if needed.

Certifications:

- **Deloitte ([link](#))**
Data Analytics Job Stimulation
March, 2025.
